Subject Index

Acetyl-CoA carboxylase
  activation of, 24–29
  chick liver, 23–36
  depolymerization of, 32–35
  polymerization of, 29–32
  rat mammary gland, studies on, 189–199
Aciduria, organic, biotin deficiency without, 426–429
Alimentation, parenteral, biotin deficiency and, 314–332
Animals
  biotin deficiency in, assessment of, 86–94
  farm, biotin responsive conditions in, 91–94
Antibodies, monoclonal, to biotin, 423–424
Avidin-biotin interaction, receptor affinity chromatography based on, 359–373

Biocytin
  excretion, 281–283
  renal loss of, biotinidase deficiency associated with, 272–286
Biotin
  biotinidase as possible mechanism for recycling of, 400
  blood lipids and, 407–413
  cellular functions of, 1–85
  clinical problems relating to, 222–223
  crystallographic investigations of, 152–158
  deficiency, *see* Biotin deficiency
  early investigations of, 1–3
  extraction from pharmaceuticals, premixes, foods, and feeds, 420–422
  fatty acid synthesis in chicks and, 105–110
  growth factor production and, 212–220
  growth rate (swine) and, 116–117
  haircoat condition in swine and, 114–115
  human nutrition and, 97–102
  isotope dilution assay for, 122–127
  mechanism of action in enzyme reactions, 140–201
  monoclonal antibodies to, 423–424
  nutritional aspects of, 86–139
  protein-bound, possible role of biotinidase in processing of, 257–258
  radiometric-microbiological assay of, 398–399
  renal excretion of, 280–281
  renal loss of, biotinidase deficiency associated with, 272–286
  reproduction in swine and, 115
  requirement (swine), factors influencing, 117–118
  swine nutrition and, 112–118
  tissue levels and, 115–116
  toe lesions in swine and, 112–114
  transport to oocytes, 202–210
  uptake and efflux in cultured rat hepatocytes, 435
  uptake by isolated rat liver hepatocytes, 350–357
Biotin-avidin interaction, receptor affinity chromatography based on, 359–373
Biotin corepressor, 342–344
Biotin deficiency
  behavioral and biochemical consequences in rats, 430–433
  biochemical abnormalities, 87–88
  biotin supply and, 133–139
  clinical manifestations of, 86–87
  dietary malonic acid effects on lipogenesis during, 107–108
  effects on fatty acid composition, 108–109
  effects on lipid metabolism in chicks, 109
  fatty acids in, 425
  in animals, assessment of, 86–94
  in *vivo* inhibition of lipogenesis by, 105–107
  parenteral alimentation and, 314–332
  without organic aciduria, 426–429
Biotin operon, regulation of the, 335–348
Biotin repressor, 344–348
Biotin status
  assessing, criteria for, 89–91
  assessment of, 129–131
  in diabetics, 389–392
  of epileptics, 297–311
Biotin supplementation, 327–328
  biochemical response, 328
  clinical response, 327–328
Biotin supply, biotin deficiency and, 133–139
Biotin transport, cellular, studies of, 249
Biotinidase
  biochemistry of, 252–253
  determination of activity in human plasma using [^{14}C] biotin as substrate, 434
  human serum, 386–388
  possible mechanism for recycling biotin, 400
  possible role in processing of protein-bound biotin, 257–258
Biotinidase deficiency, 252–260
  associated with renal loss of biocytin and biotin, 272–286
  neonatal screening of, 258–259
  prenatal diagnosis of, 258–259
  treatment of, 259–260
Blood lipids, effect of biotin and fat type on, 407–413

Carboxybiotin derivatives, crystallographic investigations of, 158–166
Carboxylase deficiency
  biotin-dependent, 225–232
  combined, enzyme studies in, 235–249
  multiple, prenatal treatment of, 263–269, 414–416
Carboxylase(s)
  acetyl-CoA, *see* Acetyl-CoA carboxylase
  biotin-dependent, cultured human fibroblasts and, 235–239
  fungal pyruvate, structure and regulation of, 56–70
  propionyl-CoA, 225
    sheep liver, 396
  pyruvate
    deficiency, 229–231
    mechanisms of the partial reactions, 169–186
Cells in culture
  function of biotin in, 38–54
  requirement for biotin in, 38–54
  stimulation of growth factor production by biotin, 212–220
Cellular biotin transport, studies of, 249
Chick liver acetyl-CoA carboxylase, citrate-induced activation and polymerization of, 23–36
Chickens, *see* Poultry
Chromatography
  receptor affinity, 373–384
    based on avidin-biotin interaction, 339–373
Crystallographic investigations, 152–167
Crystals, electron microscopy of, 18, 20, 403–404
Culture, cells in, *see* Cells in culture

d-biotin, studies of, 140–150
Decarboxylases
  biotin-dependent, as energy transducing systems, 72–83
  sodium transport, physiological significance of, 83
Deficiency, *see* Biotin deficiency; Biotinidase deficiency; Carboxylase deficiency; Holocarboxylase synthetase, deficiency
Depression, biotin-responsive, during hyperalimentation, 406
Diabetics, biotin status and plasma glucose in, 389–392
Diets, biotin-free or fiber-free, growth and tissue minerals in weanling rats fed, 417–419

Eggs, nutritional aspects of biotin deposition in, 202–203
Electron microscopy of crystalline transcarboxylase, 18–20, 403–404
Epileptics, biotin status of, 297–311
Escherichia coli, regulation of biotin operon in, 335–348
Extraction of biotin from pharmaceuticals, premixes, foods, and feeds, 420–422

Fat metabolism, abnormal, biotin-related, in chickens, 401–402
Fatty acid composition, biotin deficiency effects on, 108–109
Fatty acid synthesis, biotin and, 105–110
Fatty acids, in biotin deficiency, 425
Feeds, extraction of biotin from, 421–422
Fibroblasts, cultured human
  biotin-dependent carboxylases and, 235–239
  carboxylase synthetase in, 239–244
Foods, extraction of biotin from, 421–422
Fungal pyruvate carboxylases, structure and regulation of, 56–70

Growth factor production, biotin and, 212–220
Growth rate (swine), biotin and, 116–117

Haircoat condition (swine), biotin and, 114–115
Hepatocytes
  rat, biotin uptake and efflux in, 435
  rat liver, biotin uptake by, 350–357
Holocarboxylase synthetase
  in cultured human fibroblasts, 239–244
  deficiency, 288–293
  subcellular distribution of, 393–395
Horses, biotin-responsive conditions in, 94
Human serum biotinidase, 386–388
Hyperalimentation, biotin-responsive depression during, 406

Isotope dilution assay for biotin, 122–127

Lipids, blood, effects of biotin and fat type on, 407–413
Lipogenesis
  dietary malonic acid effects on, during biotin deficiency, 107–108
  in *vivo* inhibition of, by biotin deficiency, 105–107

Metabolism, abnormal fat, biotin-related, in chickens, 401–402
Microscopy, electron, of crystalline transcarboxylase, 18–20, 403–404
Monoclonal antibodies to biotin, 423–424

Nutrition
  human, biotin in, 97–102
  swine, biotin in, 112–118

Oocytes
  biotin transport to, 202–210
  riboflavin deposition in, 206–207
Organicacidemia, 235

Parenteral alimentation, biotin deficiency and, 314–332
Pharmaceuticals, extraction of biotin from, 420–422
Pigs, *see* Swine
Plasma biotinbinding protein, 205–206
Plasma glucose and biotin status in diabetics, 389–392
Poultry
  biotin and fatty acid synthesis in chicks, 105–110
  biotin-related abnormal fat metabolism in chickens, 401–402
  biotin-responsive conditions in, 91–93
  biotin status in, 89
  fatty liver and kidney syndrome, 91–92
  sudden death syndrome in, 92–93
Premixes, extraction of biotin from, 420–422
Propionic acid fermentation, role of transcarboxylase in, 6
Proprionicacidemia, 225–229
Propionyl-CoA carboxylase, 225
  sheep liver, 396
Proteins, biotin-binding, 202–210
Pyruvate carboxylase, 229
  deficiency, 229–231
  fungal, structure and regulation of, 56–70
  mechanisms of the partial reactions, 169–186

Radiometric-microbiological assay of biotin, 398–399
Rat acetyl-CoA carboxylase, 189–199
Rat liver hepatocytes, isolated biotin uptake by, 350–357
Rats
  behavioral and biochemical consequences of biotin deficiency in, 430–433
  biotin-dependent parameters in, and their response to biotin supply, 133–136
  weanling, fed biotin-free or fiber-free diets, growth and tissue minerals in, 417–419
Receptor affinity chromatography 373–384
  based on avidin-biotin interaction, 359–373
Reproduction, swine, biotin and, 115
Riboflavin, deposition in oocytes, 206–207

Sheep liver propionyl-CoA carboxylase, 396
Swine
  biotin requirement, factors influencing, 117–118
  biotin-responsive conditions in pigs, 93
  growth rate, biotin and, 116–117
  haircoat condition, biotin and, 114–115
  nutrition, biotin and, 112–118
  reproduction, biotin and, 115
  tissue levels, biotin and, 115–116
  toe lesions, biotin and, 112–114

Tissue levels, biotin and, 115–116
Toe lesions (swine), biotin and, 112–114
Transcarboxylase, 3–20
  amino acid sequence, 12–18
  biotinyl subunit, 9–12
  catalysis of the partial reactions, specificity of, 4–6
  crystalline, electron microscopy of, 18–20, 403–404
  Mickey Mouse form of, 3
  role in propionic acid fermentation, 6
  structure of, assembly of subunits and, 403–404
  subunits
    assembly of, 403–404
    nomenclature of, 3–4
  undissociated, structure of, 6

ANNALS OF THE NEW YORK ACADEMY OF SCIENCES

VOLUME 447

June 24, 1985

BIOTIN[a]

Editors and Conference Chairmen

KRISHNAMURTI DAKSHINAMURTI and HEMMIGE N. BHAGAVAN

CONTENTS

Introductory Remarks. *By* KRISHNAMURTI DAKSHINAMURTI ix

Part I. Cellular Functions of Biotin and the Regulation of Biotin Enzymes

Transcarboxylase: Its Quaternary Structure and the Role of the Biotinyl Subunit in the Assembly of the Enzyme and in Catalysis. *By* HARLAND G. WOOD and GANESH K. KUMAR 1

Kinetics of Citrate-induced Activation and Polymerization of Chick Liver Acetyl-CoA Carboxylase. *By* NARLIN B. BEATY and M. DANIEL LANE 23

Requirement for Biotin and the Function of Biotin in Cells in Culture. *By* KRISHNAMURTI DAKSHINAMURTI, LORRAINE CHALIFOUR, and RAJINDER P. BHULLAR 38

The Structure and Regulation of Fungal Pyruvate Carboxylases. *By* STEPHEN A. OSMANI, MICHAEL C. SCRUTTON, and FRANK MAYER 56

Biotin-dependent Decarboxylases as Energy Transducing Systems. *By* PETER DIMROTH 72

Part II. Nutritional Aspects of Biotin

Assessment of Biotin Deficiency in Animals. *By* COLIN C. WHITEHEAD 86

Biotin in Human Nutrition. *By* JEAN-PIERRE BONJOUR 97

Biotin Effects on Fatty Acid Synthesis in Chicks. *By* WILLIAM E. DONALDSON.. 105

Biotin in Swine Nutrition. *By* E. T. KORNEGAY 112

Isotope Dilution Assay for Biotin. *By* R. P. BHULLAR, S. H. LIE, and K. DAKSHINAMURTI 122

Assessment of Biotin Status: Clinical Implications. *By* HERMAN BAKER 129

Biotin Deficiency and Biotin Supply. *By* ROLAND BITSCH, ANNAMÁRIA TÔTH-DERSI, and DIETER HOETZEL 133

Part III. Mechanism of Action of Biotin in Enzyme Reactions

NMR Studies of the Exchange of the Amide Protons of *d*-Biotin and Its Derivatives. *By* DAVID C. FRY, TERRY FOX, M. DANIEL LANE, and ALBERT S. MILDVAN 140

[a]The papers in this volume were presented at a conference entitled Biotin, which was held by the New York Academy of Sciences in New York City on May 2–4, 1984.

Crystallographic Investigations of Biotin and Carboxybiotin Derivatives. *By* WILLIAM STALLINGS and GEORGE T. DETITTA 152

Pyruvate Carboxylase: Mechanisms of the Partial Reactions. *By* JOHN C. WALLACE, NELSON B. PHILLIPS, MARK A. SNOSWELL, GREGORY J. GOODALL, PAUL V. ATTWOOD, and D. BRUCE KEECH 169

Studies on Rat Mammary Gland Acetyl-CoA Carboxylase. *By* FAZAL AHMAD and PATRICIA M. AHMAD 189

Part IV. Biotin Transport and Biotin-binding Proteins

Biotin-binding Proteins and Biotin Transport to Oocytes. *By* HAROLD B. WHITE, III 202

Stimulation of Growth Factor Production in Cultured Cells by Biotin. *By* MERWIN MOSKOWITZ and DAVID K. S. CHENG 212

Part V. Clinical Problems Relating to Biotin

Clinical Problems Relating to Biotin. *By* WILLIAM L. NYHAN 222

Biotin-dependent Carboxylase Deficiencies (Propionyl-CoA and Pryuvate Carboxylases). *By* ROY A. GRAVEL and BRIAN H. ROBINSON 225

Enzyme Studies in Combined Carboxylase Deficiency. *By* KIM BARTLETT, H. K. GHNEIM, J-H. STIRK, H. J. WASTELL , H. S. A. SHERRATT, and J. V. LEONARD 235

Biotinidase Deficiency. *By* BARRY WOLF, GREGORY S. HEARD, JULIE R. SECOR MCVOY, and ROBERT E. GRIER 252

Prenatal Treatment of Multiple Carboxylase Deficiency. *By* KARL S. ROTH 263

Biotinidase Deficiency Associated with Renal Loss of Biocytin and Biotin. *By* E. REGULA BAUMGARTNER, TERTTU SUORMALA, HUGO WICK, JOCHEN BAUSCH, and JEAN-PIERRE BONJOUR 272

Biotin Holocarboxylase Synthetase Deficiency. *By* LAWRENCE SWEETMAN, BETTY J. BURRI, and WILLIAM L. NYHAN 288

Biotin Status of Epileptics. *By* KLAUS-HENNING KRAUSE, JEAN-PIERRE BONJOUR, PETER BERLIT, and WALTER KOCHEN 297

Biotin Deficiency Complicating Parenteral Alimentation: Diagnosis, Metabolic Repercussions, and Treatment. *By* DONALD M. MOCK, DAVID L. BASWELL, HERMAN BAKER, RALPH T. HOLMAN, and LAWRENCE SWEETMAN 314

Part VI. Biotin Biosynthesis and Metabolism, Biotin As a Molecular Probe

Regulation of the Biotin Operon in *E. coli*. *By* MAX A. EISENBERG 335

Biotin Uptake by Isolated Rat Liver Hepatocytes. *By* DELORES M. BOWERS-KOMRO and DONALD B. MCCORMICK 350

Receptor Affinity Chromatography Based on the Avidin-Biotin Interaction. *By* KLAUS HOFMANN and FRANCES M. FINN 359

Receptor Affinity Chromatography. *By* RONALD A. KOHANSKI and M. DANIEL LANE 373

Poster Presentations

Human Serum Biotinidase. *By* J. CHAUHAN, H. EBRAHIM, R. P. BHULLAR, and K. DAKSHINAMURTI 386

Biotin Status and Plasma Glucose in Diabetics. *By* JOHN C. COGGESHALL, JOHN P. HEGGERS, MARTIN C. ROBSON, and HERMAN BAKER 389

The Subcellular Distribution of the Holocarboxylase Synthetase of Rat Liver. *By* NADINE D. COHEN, MICHAL THOMAS, and MARGARET STACK 393

Sheep Liver Propionyl-CoA Carboxylase: Purification and Some Molecular Properties. *By* GREGORY J. GOODALL, WALTHER JOHANNSSEN, JOHN C. WALLACE, and D. BRUCE KEECH 396

Radiometric-Microbiological Assay of Biotin in Human Plasma. *By* TOMAS R. GUILARTE 398

Biotinidase—A Possible Mechanism for the Recycling of Biotin. *By* GREGORY S. HEARD, ROBERT E. GRIER, DEBRA L. WEINER, JULIE R. SECOR MCVOY, and BARRY WOLF 400

Biotin-related Abnormal Fat Metabolism in Chickens and Its Consequences. F. H. KRATZER, J. L. BUENROSTRO, and B. A. WATKINS 401

Assembly of Subunits and Structure of Transcarboxylase: Sequence Requirement and Electron Microscopy of Crystals. *By* GANESH K. KUMAR, HELGA BEEGEN, and HARLAND G. WOOD 403

Biotin-responsive Depression during Hyperalimentation: A Case Report. *By* James L. Levenson 406

Effects of Biotin and Fat Type on Blood Lipids, Red Cell and Liver Fatty Acids of Rats. *By* MARY W. MARSHALL and JOANN ZIYAD 407

Prenatal Treatment of Biotin-responsive Multiple Carboxylase Deficiency. *By* SEYMOUR PACKMAN, MITCHELL S. GOLBUS, MORTON J. COWAN, LAWRENCE SWEETMAN, WILLIAM NYHAN, BETTY J. BURRI, and HERMAN BAKER 414

Growth and Tissue Minerals in Weanling Rats Fed Purified Biotin-Free or Fiber-Free Diets. *By* J. I. RADER, C. M. GASTON, K. A. WOLNIK, F. L. FRICKE, and M. R. S. FOX 417

Extraction of Biotin from Pharmaceuticals, Premixes, Foods, and Feeds. *By* JACOB M. SCHEINER 420

The Preparation and Characterization of Monoclonal Antibodies to Biotin. *By* A. SCOOT, K. DAKSHINAMURTI, E. RECTOR, G. DELESPESSE, and A. SEHON 423

Behavioral and Biochemical Consequences of Biotin Deficiency in Rats. *By* CHARLES N. STEWART and HEMMIGE N. BHAGAVAN 425

Fatty Acids in Biotin Deficiency. *By* SHARON F. SUCHY, WILLIAM B. RIZZO, and BARRY WOLF 429

Biotin Deficiency without Organic Aciduria. *By* HERBERT M. SWICK and C. LAWRENCE KIEN 430

Determination of Biotinidase Activity in Human Plasma Using [^{14}C]Biocytin as Substrate. *By* LE PHUC THUY, BARBARA ZIELINSKA, LAWRENCE SWEETMAN, and WILLIAM L. NYHAN 434

Biotin Uptake and Efflux in Cultured Rat Hepatocytes: Implications for the Treatment of Biotinidase Deficiency. *By* DEBRA L. WEINER and BARRY WOLF 435
